

Room Management System

Room Management System is used to display room information for different usage like meeting rooms schedules, classrooms, events...

The middleware responsible of controlling and streaming over meeting room's door label screens provides the user with features like reserving meeting room space, displaying the availability of meeting rooms (available/busy), upcoming events, and advertisements. The below features are included with the meeting room's signage software:

- ✓ Reservation of Meeting room Space.
- ✓ Start time, End time and Name of the coming or ongoing meeting.
- ✓ Displaying the availability of meeting room.
- ✓ Displaying the occupation of meeting room.
- ✓ Date/Time.
- ✓ Integration with Outlook Exchange Server
- ✓ Meeting room number, floor number.
- ✓ Upcoming events.
- ✓ Event name and Author.
- ✓ Company Logos.
